

## ***Making Technology Great Again***

John Williamson – Instructional Technology Coach, Greater Altoona Career and Technology Center

At our school, we ask faculty and staff to provide feedback on the school's Learning Management System and other technology-related issues several times during the school year. Professional development is then developed based on this information for in-service days, lunchtime learning, and one-on-one help. During this session, the presenter will be sharing some experiences and challenges of instructors using games, and other technologies to help increase performance within their programs. These include Edpuzzle, Wordtune, Gimkit, Wordwall, Banzi, and CTE Online.
