

Special Populations through AI: User Workshop

Michael Stein – CTE Innovation Systems Coordinator, Berks Career & Technology Center

This workshop offers interactive experiences with AI tools, focusing on their application in education for special population students. Participants will engage in hands-on demonstrations using AI, gaining insights into real-world AI implementation in the classroom. The session will guide attendees in developing personalized AI integration strategies for their students using pre-prompting. It will conclude with actionable steps for employing AI in lesson adaptations contexts. Please bring a laptop with access to the Internet to participate.
